

# ProFect® 2702

For parquet floors and bended wood

## ProFect® 2702

- Urea low formaldehyde adhesive suitable for production of parquet flooring, bended wood and solid wood.
- Usable where extreme low emissions of formaldehyde are required in the end-product.
- Possibility of gaining CARB2 in e.g. bended plywood and parquet flooring.
- Less than 0,1% free formaldehyde - no hazard labeling needed.

# ProFect® 2702

- ProFect® 2702 is a liquid Urea low formaldehyde adhesive.
- Used together together with different hardeners, depending of purpose/end-product.

## Technical data and processing

Glue system: ProFect® 2702	Emission class: CARB 2
Application	Roller
Wood moisture	7-13 %
Glue spread	100-150 g/m <sup>2</sup> *
Press temperature	80-125°C*

\* Test on actual line is needed to determine correct parameters

**Compliant to ANSI – Water resistance test** ✓
